NOVENCO Building & Industry A/S, a market leader in energy efficient direct “free cooling” solutions for data centers, has received two significant orders from Facebook

NOVENCO is proud to announce today that it received two significant orders to provide cooling solutions for two new Facebook data center buildings in the USA. The scope is to deliver direct “free cooling” solutions consisting of Fan Arrays and Relief Fans, based on NOVENCO’s unique and patented ZerAx® fan technology. All the equipment will be delivered in 2019.

“We are proud to have won our largest order ever in NOVENCO’s history for the delivery of customized cooling solutions for our clients’ mission critical data centers. Since our first deliveries to Facebook’s data center in Luleå, Sweden, we have invested heavily in further refining the design and implementing new advanced technology, achieving the market’s highest levels of efficiency and lowest TCO over the expected data center lifetime of >20 years. NOVENCO’s patented technology and high focus on the data center market, has already received high attention from several large players in the Hyperscale data center space”, says Lars Knaack, CEO at NOVENCO Building & Industry.

Facebook data centers are renowned for having very low PUE values and amongst the most advanced and energy efficient in the world.
