

Exciting Job Opportunity!

NOVENCO Building & Industry is looking for Supervisor - Commissioning & Service for International Hyperscale Data Centers and Car Park Projects.

NOVENCO Building & Industry has received two significant orders from Facebook to provide cooling solutions for two new “Hyperscale” data centers in the USA. The scope is to deliver direct “free cooling” solutions consisting of Fan Arrays and Relief Fans, based on NOVENCO’s unique and patented ZerAx® fan technology.

We are therefore looking for a new supervisor who will have the overall responsibility for onsite supervision, commissioning, maintenance and service of our ventilation equipment, initially for our Data Center projects but also for our coming Car Park ventilation projects in the Nordic region.

You will be responsible for managing projects onsite and must therefore have extensive experience in people management and leadership. The individual must be customer focused at all times, be prepared to work within and as part of a team, be able to interact with customers, colleagues, management at all levels and external contractors in a professional and tactful manner.

Key tasks and responsibilities

- Onsite and remote management, supervision and technical support in connection with the installation, commissioning and service work performed by our customers’ contractor or by NOVENCO’s local service partner.
- Scheduling and coordinating work according to strict deadlines.
- Ensuring that equipment works in accordance to its specifications.
- Creating and carrying out test procedures for startup and commissioning of equipment.
- Investigating problems, troubleshooting and in some cases repairing faults.
- In some cases, hands-on programming of PLCs, VFDs and mechanical adjustments of equipment.
- Daily/weekly collaboration and coordination with internal and external engineering departments.
- Writing reports and ensure proper technical & commercial documentation for the customer and/or their contractors.
- Ensure safe working conditions at site.
- Conduct training courses for maintenance and operations staff where appropriate.

Qualifications

- Minimum 5 years’ management experience with similar job function in the ventilation industry, with in-depth knowledge of electrical systems, controls and mechanical equipment.
- Mechanical Engineering degree.
- Fluent in Danish and English, both spoken and written and preferably other languages.

- Leadership and managerial skills, commercial awareness and ability to work well under pressure.
- Excellent interpersonal and communication skills.
- Good IT and analytical skills.
- The ability to cope with unusual working hours, which is sometimes required when equipment is located in other time zones and in 24-hour operation.
- Thrive in a truly international environment and enjoy travelling up to 60-80 days per year.

What we offer?

- A company in strong growth.
- Dynamic work environment with open communication.
- Attractive salary & pension package and private health insurance.

Interested?

If you have any further questions about the job, please contact Martin Bo Olszak, Project Manager, phone +45 5578 1253.

Send your application and CV marked " Supervisor" to Human Ressource at: job@novenco-building.com

Deadline is June 21st 2019.
