More thrust and lower
sound levels.

CLICK-CLICK MOUNTING
Innovative system to
reduce mounting time.

EN 12101-3:2015
Certified jet fans for smoke
control in car parks.

As the inventor of the ductless car park ventilation system 25 years ago, NOVENCO keeps on innovating with a unique new range of car park jet fans.

By taking the entire fan engineering process outside the box, NOVENCO has designed a new range of jet fans that goes back to basics with a host of great benefits that will meet your design requirements.

Smarter in every detail.

Based on the innovative design of the ZerAx® range of axial flow fans, this new range of car park jet fans provide additional key benefits, such as cost reduction, space saving, optimal induction and easy installation in combination with low energy and sound levels.
