

## Tool Certificate – T26003

This certificate is issued by EPD Denmark and confirms that the tool specified below (LCA tool) has been verified by an independent third-party verifier and approved by EPD Denmark.

The tool may be used for the publication of both project and product EPDs within the specified product categories, which may be approved through a simplified verification procedure and published in the database at [epddanmark.dk](http://epddanmark.dk).

The tool is approved for use during the specified validity period, provided that it continues to comply with the specified technical specifications and that no changes are made to the tool other than those agreed upon during verification. EPDs generated by this tool are valid as part of EPD Denmark's EPD programme.

The tool may only be used by approved users.

### General information

|                                            |                                    |
|--------------------------------------------|------------------------------------|
| Tool name                                  | T26003                             |
| Tool version number                        | 1st version                        |
| Owner of the tool (company / legal entity) | NOVENCO Building & Industry A/S    |
